## Surround yourself with Strong, Protective Energies for Greater Health Heal with Spiral Energy

The uplifting, supportive, caring energy that every Harmoniser gives comes from very high frequency energy water and spiral geometry. The picture of the one that is best for you may attract your attention or feel more interesting to explore.

Each is made of copper or silver plated tubing filled with water that has a very loving energy held within implosion structured water and the benefit of metal frequencies.

The energy you receive increases in frequency as you move from copper through to silver. Each person is drawn to different metals at different times. Loving energy invites us to increase our frequencies to be in harmony with love. By this process we ourselves become more loving. Our cells resonate more and more with higher frequencies; love, joy and happiness, and there can be periods of healing in which one doesn't feel so good while this happens.

The initial feeling of love and support first felt is true. What is not feeling so good is what you are to release if you want to open to more love, and be more loving. Old aches and pains come back if they are essential for you to grow into this greater loving state and then they are no longer present.

Love yourself, trust your support and take it easy during these down-times. The deeper sense of relationship, love and connection, which you grow into, will feel worth it. Wear it less if that feels right and 24/7 once you are in harmony.

Different metals have different electrical and medical properties. Copper is earthy and more grounded in physical reality. Silver gently explores feminine, loving, nurturing energies. All the metals used in the Harmonisers strengthen the immune system, stop the growth of microbes associated with disease, and bring in healthy vibrant energy. None of them take on disease or need cleaning of any energies.

## Copper

Copper the choice in hospitals to prevent the growth of infectious microbes also absorbs through the skin in trace amounts to reduce symptoms of arthritis and rheumatism.

Copper starts bright and shiny and tarnishes slowly in the air and with skin contact. It's golden shine is restored with a copper/brass polish such as Brasso.

Being earthy, of this world and well grounded copper is ideal for those who feel great in nature, walking barefoot, gardening and accepting themselves as they are. It is also a foundation on which to build the benefits of other metals.

## Silver

Silver was known to the ancient Hebrews, Greeks and early Egyptian alchemists as a female element whose energy was closely related to the Moon. Silver is the best conductor of energy, heat and electricity of all the metals. It is very able to go with the flow and is superconductive. Silver in colloid solution is the best bactericide and disinfectant known to medical science and is reported to create health in the presence of 650 varieties of germs, parasites, and bacteria. Refer to Dale Pond, "The Divine Triplet".

Silver explores the worlds of feelings and emotions, dreams and their meanings, which help us make our best choices, and to "go with the flow".

The silver-plated Phi Harmoniser (Illustrated above) is a popular gift with the golden Phi ratio in its small and large spirals and overall proportion. Phi is seen in the spirals of leaves around stems, berry fruits, seeds within cones and throughout the human body.

Phi Harmonisers support growth and healing of plants, animals and humans and strengthen the connections between the different parts of our bodies and nature.

Silver tarnishes slower than copper and can be restored with an impregnated jewellery polishing cloth or by dipping for a few seconds into a Silver Dip solution used for silver cutlery then wash in water. Chlorinated water tarnishes more so use another Harmoniser to clear that from your water first. Brasso or similar abrasive polishes reduce the thickness of the plating. See below for more cleaning instructions.

Triskelions with their three spirals and special abilities since Celtic times, to help heal and restructure water are illustrated here with silver. It has been a popular design for thousands of years. The trinities of spirit-mind-body, God-Spirit-Man, Father-Mother-Child, Worlds-above-here-and-below and many others are embraced within three connected spirals.

### **Benefits of the Vortex Water within your body:**

- Increases the dissolved oxygen in the water.
- Improves the body's ability to obtain nourishment and eliminate/excrete the toxins and wastes from your body.
- Reverses polarity (negative/positive) of the toxic substances, such as heavy metals, pesticides and nitrates, thereby eliminating their harmful effect on your body.
- Provides your family, guests and animals with improved health and energy, and assists your plants in growth and in "bearing fruit".
- Improved quality in the taste of the water.
- Food cooked with vortex water tastes better and lasts longer
- Works well with any filtration system.
- The higher frequencies, energy, oxygen, absence of anaerobic bacteria, and the molecular structure
- Vortex energized water does not lose its effect and may last for many months which helps to remedy traveling and being able to have vortex water available to you.
