

WHOLE HOUSE WATER FILTRATION SYSTEM

PURE-PRO-1045CL

WHOLE HOUSE CHLORINE REMOVAL SYSTEM (UP TO 6 FAMILY MEMBERS) OR 3 BATHROOMS

Price \$995 (Installation available)

Activated carbon remove chlorine, tastes, odors and organic contaminants from your water for whole house treatment. Offered with five years manufacture warranty, and **free** whole house sediment removal prefilter.

Shower in chlorinated water

The steam we inhale while showering can contain up to 50 times the level of chemicals than tap water due to the fact that chlorine and most other contaminants vaporize much faster and at a lower temperature than water. Inhalation is a much more harmful means of exposure since the chlorine gas (chloroform) we inhale goes directly into our blood stream. When we drink contaminated water the toxins are partially filtered out by our kidneys and digestive system.

Simply stated chlorine is a pesticide, as defined by the U.S. EPA, whose sole purpose is to kill living organisms. When we consume water containing chlorine, it kills some part of us, destroying cells and tissue inside our body. The Federal Environmental Protection Agency, sums it up by claiming, "the chlorine problem is similar to that of air pollution", and adds that "chlorine is the greatestcripler and killer of modern times!"

Our whole house water filters uses a granular activated carbon produced from coconut shell by a high temperature activation process under stringent quality control. It has a large surface area, high mechanical hardness, high pore volume and chemical stability. This product is NSF Certified and meets or exceeds all food chemical codex, AWWA and ASTM Protocols.

In addition our filters utilizes non-chemically impregnated activated carbon. It has been surface modified during manufacturing, to significantly enhance the carbons' capabilities. The carbon media used also has a much higher surface areas than most other competitive brands on the market. This enables them to reduce larger quantities of other organic species which may be present in the system.

What contaminates are addressed with our Whole House Water Filter

- * CHLORINE * CHLORAMINE * VOLATILE ORGANIC COMPOUNDS (VOC'S)
- * INDUSTRIAL SOLVENTS * SYNTHETIC ORGANIC COMPOUNDS (SOC'S)
- * THM's (chlorine by product) * PESTICIDE * HERBICIDES * FLUORIDE

- * No chlorine, bad tastes, foul odors
- * No electricity
- * Maintenance free for 5 years.
- * Sediment cartridge required to be replace every 6 month (\$45)
