

Dear Customer,

Eco Waterhouse Technologies is manufacturer and supplier high quality water filtration systems since 1991.

We provide commercial grade systems 100% made in USA, and offering installation and warranty services.

Eco Waterhouse Technologies specialize in individual approach to specific water problems and solutions.

Our Standard whole house system will target at least two major problems; water hardness and chemical contaminations.

Standard salt base system will include two tanks system. One tank with softening media will target water hardness, second tank with custom blend of activated carbons, will target chemical contaminations.

Standard salt free system is one larger tank system using innovate technology's, which will also target water hardness and chemical contamination.

### **Benefits of Salt-Free vs Traditional Salt-Based Softeners**

There are two types of water softeners, a **salt based water softener** and a **salt-free water softener**. Salt based water softeners will give you more of the "slick" feeling in the shower and you will notice the soap creating more bubbles. Other benefits you will see include brighter colors in your clothes, reduced scale build-up on your showers and softer skin.

**Salt-free systems** will also reduce scale buildup and provide brighter clothes and softer skin using a healthier method. The main benefit with salt-free systems is the ability to soften water without having to add sodium to the water. This is a more heart healthy and environmentally friendly system.

**Salt-based systems** are heavy duty systems that do an excellent job removing heavy water hardness. It is mostly recommended to homeowners with extreme hardness levels, specially homes with large bathroom glass enclosures.

**Salt-less systems** are 100% salt-free, they required some maintenance on glass surface, since minerals are not removed. Provide safe water families with infants, children and the elderly.

There are two pricing brackets;

- 1) Homes size up to 2,800 SF,
- 2) Homes over 2,800 SF and up to 5,000 SF.

Salt base – two tank system commercial grade;

- 1) \$2,650 installation starts from \$350
- 2) \$2,950 installation starts from \$400

Salt free systems commercial grade;

- 3) \$2,700 installation starts from \$300
- 4) \$2,980 installation starts from \$350

**We ship free to any place in USA**

Tax will apply to customers in California.
